

March 13, 2001

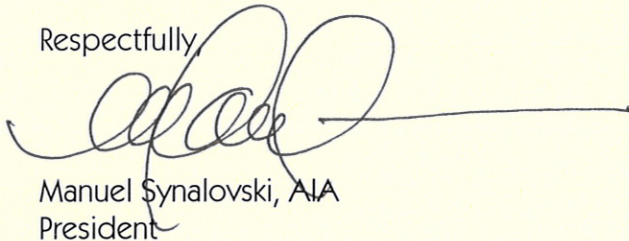

To Whom It May Concern:

We are the Architect of Record for several projects that ANF Group, Inc. has been involved with in the past few years.

ANF Group, Inc. was the General Contractor on our project for the Sagemont Upper School in Weston, Florida. As planned, the new 52,000 s.f. high school facility opened for the start of the 2000-2001 school year, due in large part to the commitment and dedication of ANF's principals and staff. With a new student population of +/- 700 students scheduled to begin classes in the fall, there was little margin for error. Their proven efforts were, at all times, focused on the goals of the client. We are satisfied with the quality of their work and are very proud of the finished project.

Currently, we are working with ANF Group, Inc. on the development of Cleary Boulevard Shoppes in Plantation, Florida and an office addition/renovation project for Hispanic Unity of Florida in Hollywood, Florida. On these projects, they have been involved throughout the construction document phases. Their input has been both valuable and critical to the success of these projects. With their continued cooperation and assistance, we look forward to bringing these projects to completion and to working with them again in the future.

Respectfully,

Manuel Synalovski, AIA
President
