To Whom It May Concern:

ANF construction group has recently completed two construction projects here at Imperial Point Medical Center. The first was a new addition of 24,000 square feet Emergency Room and the second completed just two months later was a build-out of 13,000 square feet for a new Ambulatory Surgery Center located in our Medical Arts Pavilion.

The ANF group provided excellent and accurate estimates and budgets for the Emergency Department project. Their project management team was very knowledgeable and always able to meet all the time lines throughout the entire project. In fact, the ED project was completed three months ahead of schedule and was 2% below the project budget. The ease with which this project was completed led us to have them complete the Ambulatory Surgery Center. Once again, ANF exceeded our expectations in providing another well done, under budget and on time project. The team handled all the City, County and State permitting requirements with ease and held regular project meetings to keep sub contracting on task.

We are very pleased with the ANF group, as they are very well-organized and professional and have very talented individuals working for them. The principals of the group - Al Fernandez, Nelson Fernandez and Al Gill - provided excellent oversight and administration of the projects and were always available to answer any questions. The project manager, David Trujillo, provided excellent project management on both projects. We would recommend this firm and look forward to doing future projects with them.

Sincerely,

Calvin E. Glidewell Jr.
Chief Executive Officer.
