NuFlex 302 General Purpose

silicone sealant is a 100% RTV, NSF Approved, acetoxy sealant design for multiple uses. Easily applied, no sagging, and adheres to many substrates, including metal, glass, ceramics, most types of wood and many plastics. Available in many colors, including translucent. **A best seller!**

NuFlex 302 High Temperature

silicone sealant is a 100% RTV, NSF Approved, acetoxy sealant design for extreme temperature applications, withstanding temps as high as 316°C (600°F). Like the general purpose, adheres to many substrates. Available in red and black.
