RE: **Tamarac Public Services Complex**  
*Commendation*

Dear Mike,

Miller Construction Company would like to take this opportunity to commend Lotspeich Co. of Florida on its performance at the Tamarac Public Services Complex, particular on the work involved with the Fire Station Building. While Lotspeich Co. of Florida was originally contracted to provide *Doors & Hardware, Acoustical Ceilings, Specialties, and Lockers*, it's been the addition of the drywall scope of work and the critical schedule of the Fire Station Building in which your company has demonstrated it's true abilities

We are truly appreciative of the attention you and your staff have provided this project. From the timely procurement of materials to the staffing provided to expedite the completion of the Fire Station Building, Lotspeich Co. of Florida has been a true team player, going the extra mile time and time again. As we come to the completion of this project we can truly say we look forward to having Lotspeich Co. of Florida as one of our subcontractors on future Miller Construction Company projects.

Sincerely,

**Miller Construction Company**

Max Tojeiro  
Senior Project Manager
